# OUTLINES

- Introduction
- Portfolio features
- Advantages/Benifits
- Disadvantages
- Portfolio working process
- Conclusion and Future Work

# 1. Introduction

- A personal portfolio is an evidentiary document designed to provide qualitative and quantitative information
- A professional portfolio will also show an employer proof of my organizational, communication, and tangible career related skills.
- A portfolio is a sample of my career related skills and experiences and should be presented in my own creative style.

## 2. Portfolio features

- 1. Homepage
- 2. Bio
- 3. Best works
- 4. About
- 5. Contact Us

### 3. Advantages / Benifits

1. **Personal Reflection**
2. **Smarter working**
3. **Creativity**
4. **Technology**
5. **Community**

## **1. Personal Reflection:**

Portfolios permit students, and those using a portfolio for professional purposes, to keep track of their best work and monitor how they are expanding and improving their craft or talent.

## **2. Smarter working:**

Portfolio Website have a wealth of features that are designed to make working with larger cohorts much easier.

## **3. Creativity:**

New non-linear formats and the integration of various media types allow students many ways to creatively express their professional knowledge and skills.

#### **4. Technology:**

Digital portfolios are one of the best ways for students to communicate their knowledge and expertise related to their use of technology.

#### **5. Community:**

Sharing ideas, resources and sharing of data and key information between systems.

## 4. Disadvantages

- The creation of digital portfolios requires advanced knowledge and skills and sometimes expensive, high-tech equipment.
- Another disadvantage would be plagiarism, people can view your work and easily steal it and claim it as their own.
- A portfolio (online) is that it doesn't look as professional as a paper based one and the person viewing can't get a proper feel of the work because it isn't printed and presented in front of them.

## 5. Portfolio Working Process (1)
