

Project on Personal Portfolio

CSE-0402 Summer 2021

Khondkar Md Mufrat Tasif
Department of Computer Science and Engineering
State University of Bangladesh (SUB)
Dhaka, Bangladesh
kmmufrat08@gmail.com

Abstract—This website play an important role in giving an individuals opportunity to tell my story .

A personal, or portfolio, website is an opportunity to reach more people with your work. It's also an extension of your personality and gives you the chance to craft a design that reflects who you are as a creative. If you're someone with any sort of creative output, you want people to be able to see it.

ⁿ
Index Terms—CSS, HTML, JavaScript

I. INTRODUCTION

The way you present yourself online is crucial. Whether you want to apply for a new job, advance in your career, or simply share your story with the world, creating a website will help establish you as a professional in your industry.

To put you on the path to professional success, this step-by-step guide will explain how to make a personal website from scratch, covering everything from defining your message to acing your design.

II. FEATURE'S OF WEBSITE

1. Home
2. Bio
3. Best Work Achievements
4. Images or Videos
5. Contact Us

Any work that previous any developer or researcher did, mention them in a few words.

III. HOW DO I MAKE A PORTFOLIO WEBSITE USING HTML AND CSS?

Use HTML to specify headings and paragraphs. Use HTML to specify images, small text and horizontal lines. Use HTML to add hyperlinks. Learn what CSS is and use it to control margins, background colours, text colours.

IV. HOW DO I MAKE A PERSONAL PORTFOLIO WEBSITE?

There are some steps about it . kinds of -

1. Define your message- ask yourself why you're creating a personal website. Determining your goals will help you figure out everything else, like which content to include and how to structure your site to best serve your purpose.

2. Choose a template - Once you've explored a broad selection of personal websites, you'll have more of an idea

of the type of site you want to create. To narrow it down and put yourself on the right path, you can browse through these designer-made personal website templates.

3. Add your own content - At this point, you should have a clear idea of why you're creating a personal website. Now that you've chosen a template to get you started, it's time to consider the how.

Grab a pen and paper, and make a list of all the content your site should contain.

4. Customize your design - The design of your website is just as important as the content itself. If it doesn't look the part, visitors are likely to click away from your site without giving your valuable content a second chance. there are :

- * Color scheme
- * Font choice
- * Website Layout

5. Get a second opinion if you want to - Once you've reached this stage, preview your website to check that everything loads well and that there aren't any typos or broken links. While you'll probably have a comprehensive, impressive personal website by now

6. Promote your site - After all your hard work, your personal website is up and running. But you don't want it to just sit there, lost and alone in the online world.

V. REQUIREMENTS

- * Language -
In front end - HTML, CSS.
In End - PHP
DataBase - Mysql (Not Mandatory)
- * Browser - Google Chrome
- * Software - Visual Studio Code , Xampp Server .

VI. FUTURE WORK

In future, i want to add some others features . That's are My Achievements , My Testimonials , Blogs, Capture Videos

ACKNOWLEDGMENT

I would like to thank my honourable **Khan Md. Hasib Sir** for his time, generosity and critical insights into this project.
